Galaxy plastic component cases are innovative in design and function. With their tapering sides, these hydrocarbon-resistant cases boast a series of features that make them stand out from conventional alternatives:

- Broader base for improved impact protection
- Grooves in the bottom for metal space dividers and/or plastic containers
- Designed to lie down or stand on edge, stackable

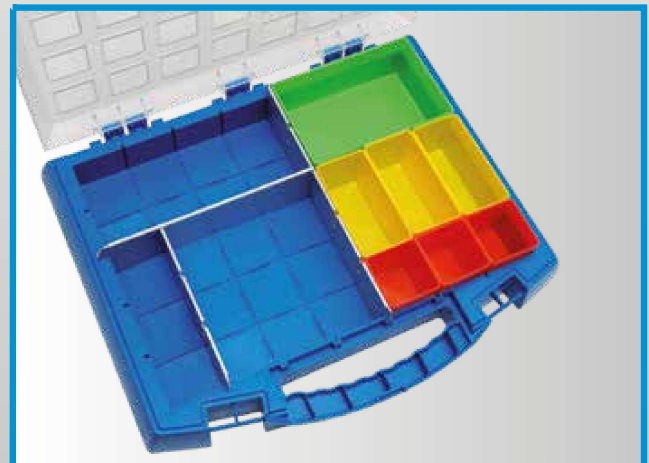

Los maletines en plástico Galaxy son innovadores tanto desde el punto de vista estético como funcional.

Realizados en tronco de cono, en plástico resistente a los hidrocarburos, presentan una serie de características que los hacen ser únicos respecto a los maletines presentes en el mercado:

- fondo destacado respecto a la tapa, para una mayor protección de los golpes.
- protuberancias en el fondo para introducir los divisores metálicos y/o las bandejas de plástico.
- diseño que permite un apoyo seguro en vertical o en horizontal, con posibilidad de apilar varios maletines uno encima de otro.

Transparent cover for a clear view of contents
Tapa transparente con total visibilidad del contenido

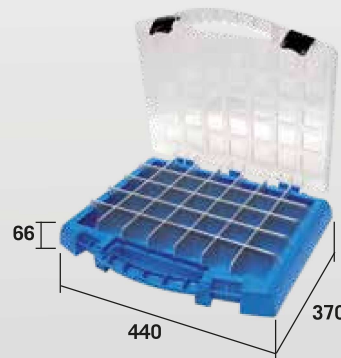

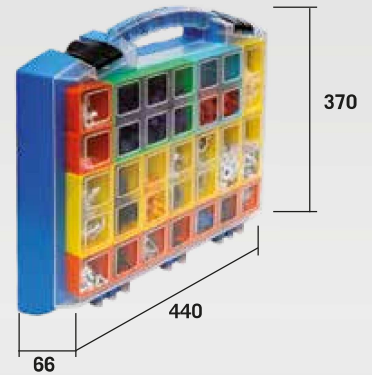

Interior can be customised with a variable number of dividers and containers.
Interno personalizable con número variable de divisores y bandejas.

Fully compatible with Syncro System case trays and sloping case shelves.

Compatibilidad total con bandejas porta maletines de cajonera y repisas inclinadas de estantería Syncro System.
