Shelves  
*Estanterías*

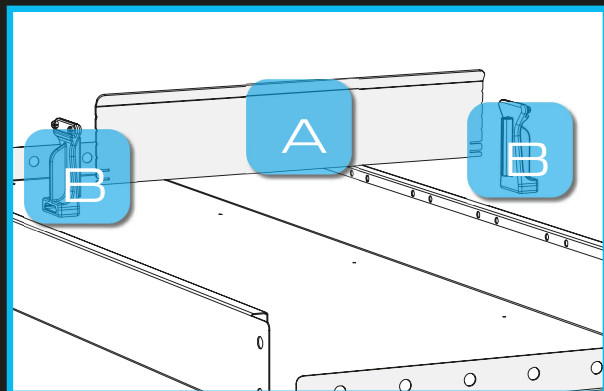

## Shelves with non-slip mats and dividers

Syncro shelves are made from high-strength steel. A non-slip mat in special, ultra-light rubber is supplied as standard. Shelf space dividers are made from anodised aluminium for maximum weight saving.

Depending on their length, shelves can be fitted with 1 to 12 dividers.

Syncro's exclusive "VIBRASTOP" system uses special plastic clips (B) to prevent contact between the dividers (A) and the shelf itself, eliminating vibration and noise.

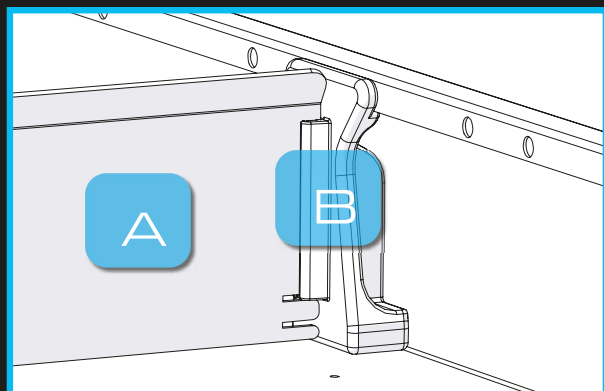

## Estantes con alfombrilla y separadores

Los estantes han sido fabricados en acero de alta resistencia. La alfombrilla en goma especial antideslizante ultraligera es de serie. Para reducir el peso al máximo, todos los separadores han sido fabricados en aleación de aluminio anodizado.

El número de separadores que pueden introducirse varía de 1 a 12, según la longitud de la bandeja.

Gracias al sistema exclusivo "VIBRASTOP", constituido por aplicaciones en plástico (B) que aíslan los separadores (A) de la bandeja, todas las vibraciones se eliminan, garantizando la ausencia de ruidos.

## Divider locking system *Tope para divisores*

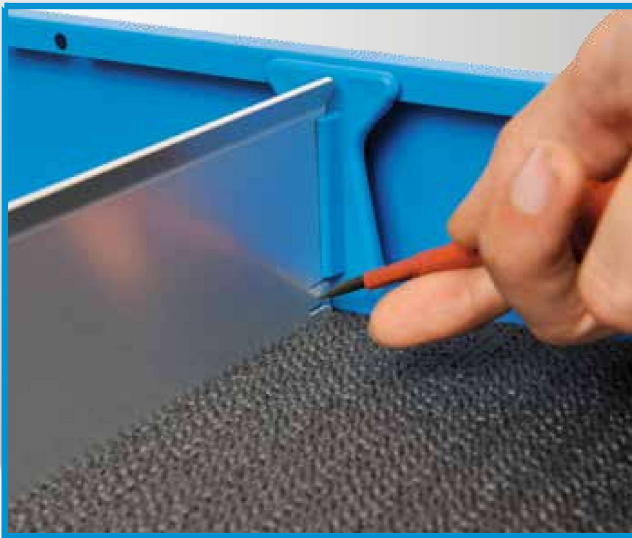

Syncro's unique locking system eliminates the problem of dividers vibrating and coming loose!

All Syncro dividers incorporate this exclusive system. Dividers can be locked in place easily and securely by bending two tabs at the bottom with the tip of a screwdriver. Dividers can be moved or taken out again simply by straightening the tabs.

*Gracias al exclusivo sistema de bloqueo, ¡ya no más problemas con separadores que vibran o se salen!*

*Todos los separadores del sistema SYNCRO cuentan de serie con el exclusivo sistema de bloqueo.*

*Simplemente deformando ligeramente con la punta de un destornillador las dos lengüetas en la base de separador, es posible bloquearlo de forma sencilla y eficaz. En cualquier momento, simplemente enderezando las lengüetas, es posible extraer o desplazar el separador.*

## Non-slip mats / *Alfombrillas antideslizantes*

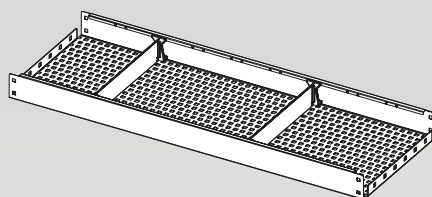

Syncro System non-slip mats for shelves and drawers weigh 85% less than conventional mats in ribbed rubber.

*Las alfombrillas antideslizantes que llevan todas las bandejas y cajoneras garantizan un peso inferior en la medida del 85% respecto a las alfombrillas normales en goma acanalada.*

## Low-back shelves with non-slip mats and dividers

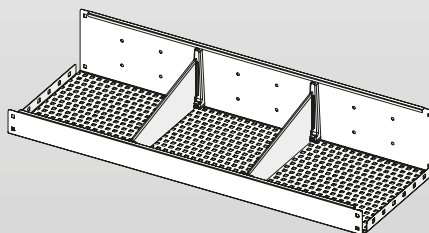

## Repisas bajas de estantes con alfombrilla y separadores

## Back panels Paneles de cierre

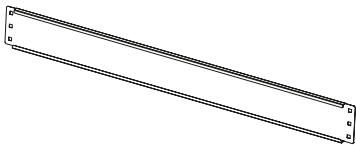

Back panels are horizontal elements for use behind shelves. In conjunction with other Syncro Syncro components they help to form enclosed storage spaces.

XSP back panels with special bottom fins are available for XDS shelves with dividers.

Los paneles de cierre son elementos horizontales que, utilizados junto a otros componentes Syncro Syncro, permiten definir espacios y huecos destinados a guardar materiales que el usuario desea almacenar dentro de los equipamientos.

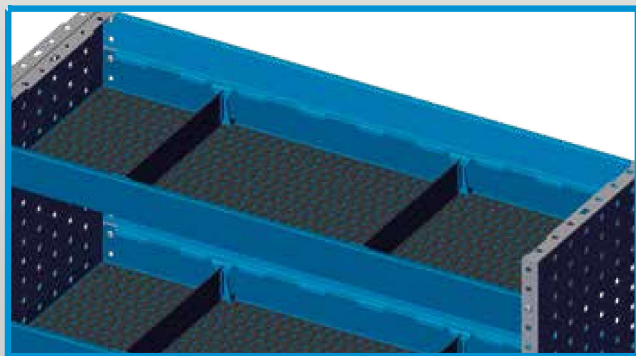

Para las filas de estantería con separadores XDS pueden utilizarse los específicos paneles de cierre con enganche XSP.

## Shelf-mounted spray can and silicone cartridge holders Bastidores porta bombonas y porta cartuchos de silicona para estantes de estantería

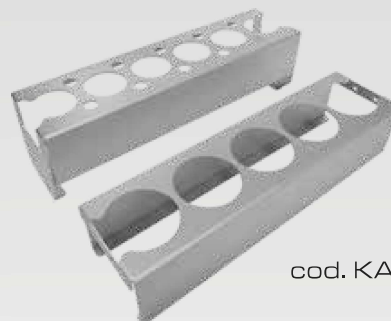

Syncro System has designed special aluminium holders to carry spray cans and silicone cartridges on shelves. These holders are fitted in place of the usual space dividers and are therefore fully compatible with shelves of 310, 360 and 410 mm in depth. Installation is flexible and the holders can be positioned in the quantity and position desired. Installation on 72 mm high shelves is straightforward and direct, while an adapter is required for 180 mm shelves.

Para organizar y transportar de forma segura bombonas spray y cartuchos de silicona, Syncro System ha desarrollado bastidores especiales de aluminio. Estos bastidores sustituyen a los divisores normales de los estantes y son compatibles con estanterías de 310, 360 y 410 mm de profundidad.

La instalación es flexible: los bastidores se pueden colocar en los estantes en la cantidad y posición preferidas. El montaje es sencillo y directo en los estantes de 72 mm de altura, mientras que para los estantes de 180 mm es necesario utilizar un adaptador especial.
