

THE UPFIT YOU DESERVE

TRUCK BED SYSTEM

BEDBOSS

For the Worksite and the Weekend

BedBoss is a **no-drill, structural solution** for **safe truck cargo management**. Constructed from industrial-grade steel and a thick composite floor BedBoss combines OEM quality manufacturing with structural support. It has more than 5x the available tie-down points and utilizes a completely no-drill install.

BEDBOSS LITE

The same juggernaut protection, minus the cargo management rail system. For simple applications like rental fleets.

NO-DRILL INSTALL

BedBoss is securely installed by four no-drill mounts that attach to your vehicle d-rings. No drilling into your truck bed. No rust. No problems.

MORE TIE-DOWNS

More than triple the amount of tie-down locations in your truck! Secure tools, gear, etc., thanks to our flexible and stress-free rail system.

HEAVY-DUTY FLOOR

Eclipse is a high-density, 19mm thick, composite floor. Anti-slip, chemical and moisture resistant, it's built for everything you throw at it.

EASY-TO-CLEAN

Built-in drains run the length of the BedBoss rails, making cleaning debris and dirt a simple task. Just break out the hose and spray it out!

TRANSFERABLE

A spray-in liner is money down the drain when your truck's lease is up. BedBoss however is an investment that can be taken along with you.
